

PNEUMATIC TUBE SYSTEM ACCESSORIES

LINERS AND INSERTS FOR 4-INCH AND 6-INCH CARRIERS

When sending patient-critical items such as lab samples, blood specimens or medications in vials or bottles that are sensitive to agitation and breakage, liners and inserts provide the extra degree of protection and suspension required for safe pneumatic tube transport. Consider the benefits of Atreo liners and inserts for your 4-inch or 6-inch tube system carriers.

Atreo liners secure and protect payload in 6-inch and 4-inch carriers.

Atreo liners are made of a highly durable synthetic material that is resistant to tears or frays, unlike standard foam. This rugged material is also resistant to stains and can be quickly disinfected. Atreo also offers a unique liner with an adhesive strip on one side that can be affixed to the interior of the carrier for continuous use. This helps reduce the potential for liner loss due to hoarding or misplacement. Atreo delivers longevity, durability and protection that is unmatched.

Features and Benefits:

- + Durability for long-life performance
- + Compatibility with common brand-name 4-inch and 6-inch carriers
- + Availability assured with unique adhesive that bonds liner with carrier

Atreo inserts protect fragile payloads from agitation and breakage.

Atreo offers a unique carrier and liner combination purchase program that reduces costs when buying both products. We also offer quantity discounts. Call or email for details.
